

Mme. Marie Varlet is a really professional expert for teaching French. Her method is systematic and theoretical. That is an important point for persons whose mother tongues are not French.

She emphasizes that grammar, vocabulary, and listening, piling up these three factors is the royal road to master French. Basing on her principle, she prepares appropriate textbooks and CDs, so she checks the progress of her students and gives them accurate advices in every lesson. As a natural result, we could realize our French proficiency improvement smoothly.

Another wonderful point is that she speaks English perfectly. This is a great help for me when I am in impasse during lesson. Her English is reliable teaching aid.

In addition, I would like to appreciate her attractive smile and sophisticated manner which make her lesson fascinating and pleasant.

Bravo ! Mme. Varlet !
